

# AUTOMATED SYSTEMS FOR POST BAKE FINISHING

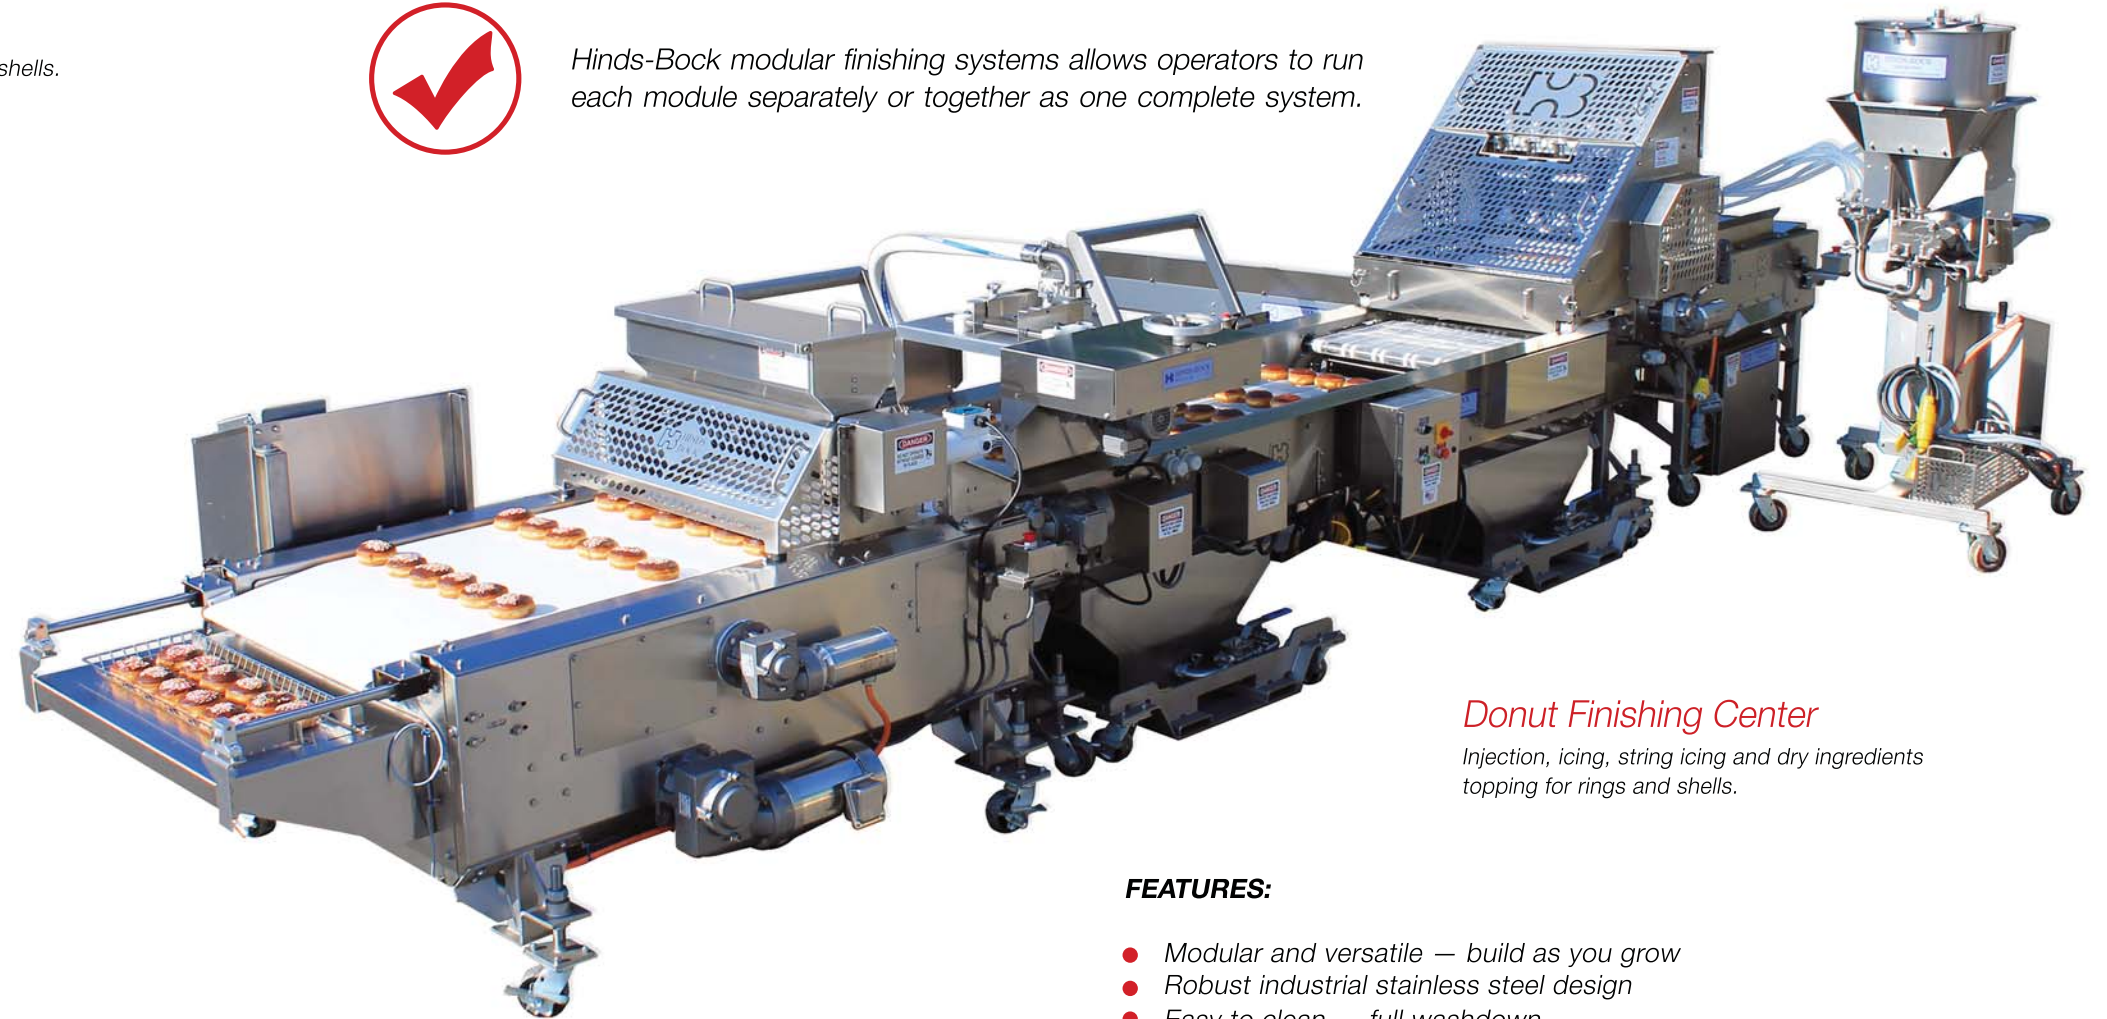

Hinds-Bock can expertly design, engineer, fabricate and install an automated donut finishing system for your specific requirements.

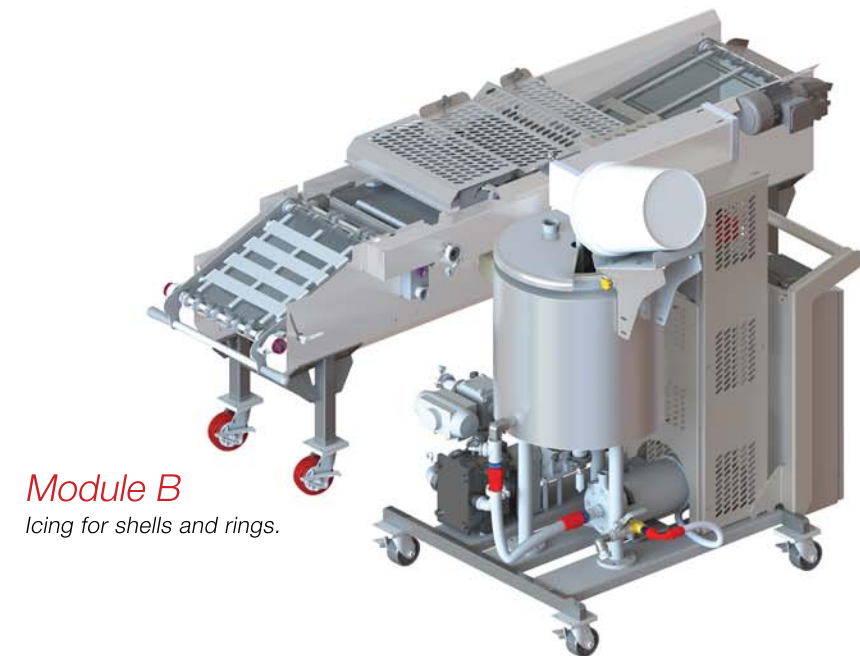

**Module A**  
Injection for donut holes and shells.

Hinds-Bock modular finishing systems allows operators to run each module separately or together as one complete system.

**Donut Finishing Center**  
Injection, icing, string icing and dry ingredients topping for rings and shells.

**Module B**  
Icing for shells and rings.

## FEATURES:

- Modular and versatile — build as you grow
- Robust industrial stainless steel design
- Easy to clean — full washdown
- High speed accurate finishing
- Optional dry ingredients depositor for sprinkles & nut pieces
- Optional string icing depositor
