

ICER-GLAZER

Variable speed string and waterfall icing.

Rugged, high quality stainless steel design

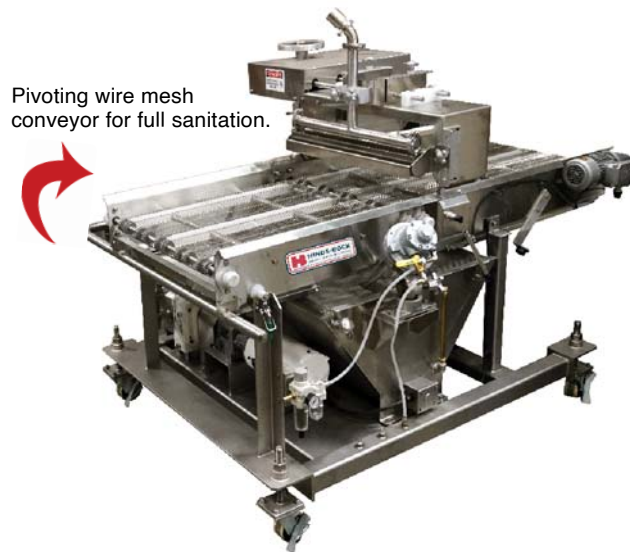

The Hinds-Bock Compact Icer/Glazer applies warm string icing and waterfall curtain icing onto a wide variety of panned and un-panned products.

The conveyor uses a two-part wire mesh belt with catch pans and optional removable center belt section for icing small unpanned products.

For easy cleaning and loading of the icing the conveyor brackets up to and away from the icer.

Rugged stainless steel construction for complete washdown and sanitation.

Pivoting wire mesh conveyor for full sanitation.

Features:

- Heated, agitated double wall icing tank.
- Adjustable waterfall trough for curtain icing.
- By-pass to prevent icing from solidifying.
- PLC and digital heat controls.
- Variable speed conveyor with oscillating head & pump.
- Two piece roll away design.
- *Easy Pivot* wire mesh conveyor.
- Left and right hand versions.

Operating Requirements:

- Air: 80 PSI
- Electrical: 208 V
